Instruction For Use

■EFFICACY or EFFECTS

To disinfect hands, fingers, skin and medical devices

■USAGE and DOSAGE

Rub as it is for disinfection

1. For external use only
2. Keep out of eyes
3. Take care not to inhale alcoholic vapor in case of broad region and/or long time use
4. Take care not to have rough skin by degreasing in case of repeated use at same region
5. Pediatric use under parental supervision
6. Wash away protein substance from the surface of medical device, which prevent alcohol component from saturating the object by clotting protein substance

■PRECAUTIONS **TABOO & PROHIBITION**

Do not use on the following region due to irritant action; **Injury site & mucosa**

Consultation required;-

The following person must have a consultation with doctor or pharmacist before using

1. Person who is under medical treatment
2. Person or his/her family with allergic diathesis
3. Person who had allergic reaction by medicine in the past

Stop using immediately and go to a doctor or pharmacist for his consultation, taking this appendix, in the presence of symptoms suggesting the followings after using;-

Eruption, redness, or itching of the skin

Others

Affection on clinical examination value:

Diagnosing test for allergy may be disturbed as redness may be caused at injection site

■CAUTIONS FOR STORAGE & HANDLING

Period of validity; 3 years from manufacturing date (Expiry date to be shown on packages)

1. Use quickly after opening sachet
2. Avoid exposure to heat, away from direct sunlight
3. Don't put close to fire
4. Keep in custody beyond child's reach
5. Don't attach to clothing to avoid decoloration and change of color
6. Harmless minute scrap(s) of cotton seed may be observed on or in absorbent cotton piece
